

Child Health Plus Formulary Guide

Includes generic and brand-name medications

November 2016

National strength. Local focus. Individual care.SM

B-1907 Y15 / 10052-15FLRX

Dear Member,

This booklet includes the **Formulary Guide** and gives you easy to understand information about your prescription drug coverage.

The medications listed have been approved by the Food and Drug Administration as safe and effective. We continually review and update our formulary.

If you have questions or need additional information, please visit our website or contact the Pharmacy Help Desk at 1-800-724-5033.

Please see your plan documents for a complete description of your pharmacy benefit.

The FLRx logo on your insurance identification card means that you have prescription drug coverage through our health plan.

What is a formulary?

A drug formulary is a list of prescription drugs that are covered by your health plan.

All generic drugs and brand name drugs listed on the formulary are covered.

If your doctor writes a prescription for one of the drugs listed on the formulary, you can go directly to your pharmacy to have your prescription filled.

If your doctor writes a prescription for a drug that is not listed on the formulary, it is considered "non-formulary." Non-formulary drugs are generally not covered. They may be covered if your doctor shows that you meet the medical guidelines for the drug and gets approval before you get your prescription filled.

How do I use the formulary?

The formulary lists covered generic and brand-name drugs. There are two ways to find your drug within the formulary:

Medical condition

Drugs are listed in alphabetical order according to drug categories. For example, drugs used to treat heart conditions are listed under the category "Cardiovascular / Heart." Drugs are listed in alphabetical order by condition.

Alphabetical listing

If you are not sure what category to look under, look for the name of your drug in the Index that follows the formulary. The Index lists drugs in alphabetical order and the page where they can be found in the formulary.

Can the formulary change?

Yes, the list is subject to change. Drugs may be added or removed at any time.

Where can I get my prescription medications?

You have access to more than 65,000 participating pharmacies in our nationwide Pharmacy Network, including national chains and most independents. Just show your ID card at any participating pharmacy and they will fill your prescription. A list of participating pharmacies in your area is available on our website.

Specialty pharmacy

Specialty pharmacies are experts in handling and distributing specialty medications. Nationally recognized specialty pharmacy Accredo Health (formerly Curascript Pharmacy) and Walgreens Specialty Pharmacy participates in our network.

Are there any restrictions on coverage?

Some covered drugs may have additional requirements or limits for coverage. If a drug has requirements or limits, it will be noted in the formulary. They may be covered if your doctor shows that you meet the medical guidelines for the drug and gets approval before you get your prescription filled.

Coverage requirements or limits may include:

- **Prior authorization**

There are some drugs on the formulary that need prior authorization, which means they need approval before you can fill the prescription. If you don't get approval, the drug may not be covered.

- **Step therapy**

Some drugs on the formulary are covered only after you have first tried another drug to treat your condition. For example, if Drug A and Drug B both treat your condition, we may not cover Drug B unless you try Drug A first. If Drug A does not work, we will then cover Drug B.

- **Specialty drug benefit**

Some drugs need to be purchased at our participating specialty pharmacies, Accredo Health or Walgreens Specialty Pharmacy, in order to be covered. If you don't purchase them through Accredo Health or Walgreens Specialty Pharmacy, the drug will not be covered. These drugs are listed on the formulary.

- **Over-the-counter drugs**

The Child Health Plus benefit allows coverage for Medicaid-approved over-the-counter drugs.

- **Quantity limits**

For certain drugs, we limit the amount of the drug that we will cover. The amount of drug we cover is based on Food and Drug Administration approved guidelines.

Key:

UPPERCASE – Brand name medication

lowercase – generic medication

PA = Prior Authorization required

QL = Quantity Limit applies

ST = Step Therapy required

MS = Drug must be purchased at a participating network specialty pharmacy for coverage
